the Leibniz Institute for the German Language (IDS) is a non-profit scientific institute of the Federal Republic of Germany, founded in 2012, and is one of the 92 Leibniz Association (Leibniz-Gemeinschaft) (c/o Leibniz-Institut für Deutsche Sprache) in Bonn. It is funded jointly by the federal government and all 16 federal states and is under the administrative supervision of the state of North Rhine-Westphalia.

The different departments which make up the institute pursue interdisciplinary, basic research projects, which means that it is essential to work in large research groups. Cross-cutting research interests include spoken language, written language, language change, and language technology. In addition, the institute addresses the linguistic aspects of language use within a societal and research infrastructure for the scientific community.

The institute is a network of scholars who work together to achieve the scientific goals of the institute. Thanks to its lecture series, conferences and colloquia, the IDS is one of the places where Germanists from near and far can meet and share their research.

The Association of the Friends of the Leibniz Institute for the German Language (Verein der Freunde des Leibniz-Instituts für Deutsche Sprache e.V.) is a Leipzig-based society that is interested in the academic work and cultural impact of the IDS.

The Leibniz Institute for the German Language (IDS) in Mannheim is a research institution that serves as a science-based service centre for the German language. In addition, it is designed to act as a resource for the public in society. It acts as the interface between public interest in questions related to the German language and how they are dealt with in linguistic research.

Languages and cultures will be kept under the microscope in the IDS. As visitors bring along the ideas and knowledge about language from their own personal experiences, they will have a direct and indirect impact on the IDS.

The German language can be explored and discussed through innovative opportunities for participation in citizen science. As part of the IDS’s activities, the general public in the spirit of modern scientific communication: in exhibitions, at events and through digital infrastructures such as “linked open data” for use in the public domain.}

In addition, it is important to note that the institute is dedicated to making non-commercial scholarly work and the development of digital tools accessible to the public.

The projects described and documented different classes of lexical units such as neologisms, borrowings and foreign words, and in addition to their segmental content, also their regional and temporal contexts. Currently the focus is on the classification of linguistic change and stability, as well as on the methodology of semantic change.

The lexical inventory of contemporary German is the largest source of data on the research agenda in the Department of Lexical Studies.
